# Addendum

This addendum is applicable to the following documents:
Series **ezPAC™** for SA310/SA320/SA330 R option devices
- Installation Manual – BG0325;
- Operational manual – BG0346.

Dual ETH port option description:
This SA3xx series option provides two Ethernet Communication ports: PORT-A & PORT-B, see the figure below.

Figure 1: Dual Ethernet Port ezPAC top view.

The dual ETHERNET ports SA3xx option cannot support the internal Embedded 56K dial up modem.

The additional ETHERNET port (B) provides 10/100Base T redundancy line.
Both ports, A and B, are connected to 10/100Base lines, while only one of them is active.
If the active line is damaged or disconnected or not available for at least 10 seconds, the IED SA3xx0 series will switch automatically to the other port, followed by LEDs port indications.
