Technical Specifications

Frequency	50/60Hz
Lead Insulation	600V AC
Core Insulation	4000V AC
Nominal Current	50% of maximum current
Lead Length	2.5m / 8.2ft (UL1015)
Operating Temperature	-40°C to +70°C
Storage Temperature	-40°C to +85°C
Material	All materials are UL approved
Standard	IEC 60044-1
Burden	0.2 VA
Thermal over current limit	40×I _{MAX} for 1 second
Short circuit over current	80×I _{MAX} for 10 ms

Installation Recommendations

All HACS incorporate a built-in automatic shorting diode protection circuit for maximum safety, shorting CT links/bars are not required.

Future provision for testing circuits may require installation of shorting CT links/bars.

Do not earth/ground HACS may cause damage to HACS Input meter

All HACS are supplied with 8ft / 2.5m cable.

Maximum cable length: can be wired up to 650ft / 200m from SATEC HACS input metering devices.

Recommended wire gauge: ≥1.5 mm² diameter cable.

It is recommended to use a shielded extension cable to connect between the HACS and the SATEC meter. The cable shield must be connected to the SATEC meter ground.

It is recommended to locate HACS cable in separate cable conduit and at least 1m (3ft) away from High Voltage circuits, and/or other high power magnetic fields.
